## Line Busting – Putting the *Quick* into Quick Serve Restaurants

**QUICK SERVE RESTAURANTS | RETAIL | HOSPITALITY | BANKS | HEALTHCARE AND MORE**

Shift into another gear with the line busting capabilities of mobile point-of-sale technology. We supply the proven rugged tools to provide quick, safe and secure cashless transactions at the point of interactions.

### EXPAND FOOTPRINT

Don't lock yourself behind that register on the counter. With mobile technology you can do business just about anywhere. Eliminate long customer waits with line busting or take your mobile PoS to outdoor tents, sidewalks, the sales floor, parking lot events and more. Mobility gives your team a larger footprint to engage with more customers.

### INCREASE CONVERSIONS

Personalize service by assisting customers with product information, availability and delivery dates during face-to-face interactions right there where they shop. Mobile technology allows associates to look up past purchases, loyalty rewards and related information to cross-sell or offer up-sell product suggestions to increase sales.

### EASY TO CARRY AND HOLD

Fatigue can quickly become a factor during the workday. Our mobile point-of-sale devices are equipped with an easy carry briefcase handle and back hand strap that allow a safe, secure and comfortable grip while making multiple transactions over long shifts.

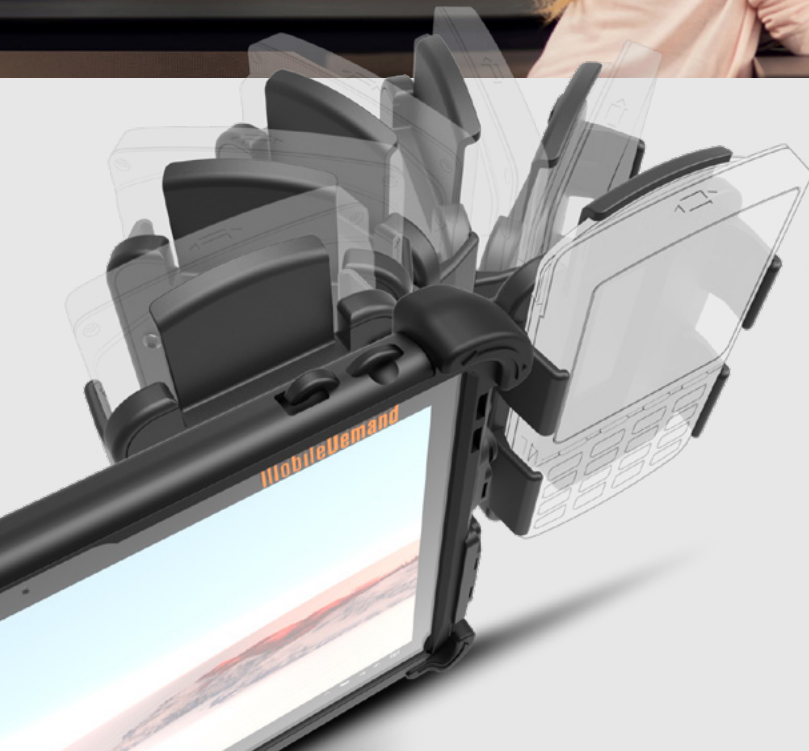

### EASE OF EXPANSION

Mobile technology is cost effective when upscaling your business. mPOS devices are lower cost than traditional checkout and payment options, allowing faster implementation of additional stores with minimal investment in IT infrastructure.

# Customers want a quicker way to pay.

Whether it's line busting at a quick serve restaurant or table side service at the local bar or BBQ joint, MobileDemand has the rugged, mobile point-of-sale solutions to get it done.

## PAYMENT MODULE BRACKETS

Verifone e285

Ingenico iSMP4

Ingenico Link/2500i

Ingenico Link/2500

## Payment Module Brackets

### Payment Bracket Kits (modules not included)

Start building your mobile point-of-sale solution from a variety of brackets that support several of today's leading payment modules. The brackets attach securely to select rugged MobileDemand devices and rotate 180° allowing customers the ability to enter personal data privately. Choose from several popular Verifone and Ingenico payment modules, sold separately, we provide everything else you need to complete your mobile payment solution.

## Magtek tDynamo and T1190

### All-in-one fully integrated payment module

We've taken out the guesswork by delivering the all-in-one, fully integrated tDynamo payment module with our rugged T1190 xTablet. An ultra-versatile reader capable of taking today's most popular payment methods, from conventional plastic to mobile wallets. The T1190/tDynamo solution delivers contactless/NFC and EMV chip card and magnetic stripe capabilities packaged with a sleek, lightweight and easy to carry mobile tablet.
